## ◦ SKILLS ◦

## SUMMARY

Passionate Full Stack Developer with **over 2 years** of hands-on experience creating high-performing and pixel-perfect user interfaces using React.js, Next.js, and TailwindCSS. Built robust and scalable backend using Node.js, Express.js, and Laravel. Familiar with both SQL and NoSQL databases. A team player, with high curiosity and ownership.

## EMPLOYMENT HISTORY

### Freelance Full Stack Developer

December 2023 — Present

- Developed and launched skinmax.ai using Laravel, incorporating APIs like OpenAI & Stable Diffusion
- Integrated 3rd party APIs** like payment systems using Stripe, error monitoring with Sentry, and analytics with PostHog
- Developed pixel-perfect interfaces** translated from Figma with TailwindCSS & added interactivity with AlpineJS
- Delivered a CRM app for a distribution company in the UK, developed in Next.js leveraging **server-side components**
- Enhanced application performances through debouncing, code splitting, implementing server-side pagination, and optimising user experience

### Full Stack Developer at CreditBook

February 2022 — September 2022

- Developed and maintained features like Cashbook & Billbook of the ledger **module used by 1 million+ users**
- Reduced technical debt by implementing automated tests, converting **JavaScript to Typescript**, and conducting regular code reviews.
- Improved overall **test coverage by 45%** using Jest
- Developed a private UI library** using StoryBook, facilitating a consistent design system

### Full Stack Developer at LastingSales

July 2020 — January 2022

- Created UML diagrams**, requirement documents, and prototype design of the complete product
- Optimised performance** massively on the deals pipeline page by reducing the response size, implementing virtual scrolling, and creating an archive feature
- Developed the **Frontend from scratch** in React.js
- Increased the product revenue by 10x by making the product bug-free and by enhancing the user experience
- Integrating Facebook API to transfer leads directly into the app

## EDUCATION

### MSc Data Science, Middlesex University London

September 2022 — October 2023

### BSc Computer Science, University of Central Punjab

July 2016 — July 2020

## ★ PERSONAL PROJECTS

### ResearchAI

SaaS application that allows you to read the latest research papers as a newsletter.

[GitHub Link](#)

- Used technologies like Next.js, TailwindCSS, Stripe, OpenAI API, Supabase, Prisma, Clerk authentication
- Extracted data from arxiv.org using the API and also wrote a script for scraping. Parsed arsed XML data to JSON to show on the app
- Pass the selected research paper to OpenAI Assistants API as a PDF and receive a summary in newsletter format

### InterviewAI

AI-generated Interview questions using your CV, Job description. [GitHub Link](#)

- I used technologies like Next.js, ShadCN, TailwindCSS, OpenAI API, Supabase, Prisma
- Allows the user to upload their target job title, job description, company description, and their CV
- User receives potential job questions with answers and tips to prepare for the interview
